Database migration pathways to Azure SQL by guidance and automation needs

But this is where *real* innovation is

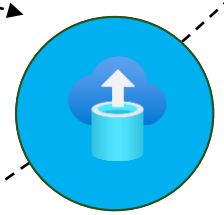

SQL Server Arc-enabled migration

Online, SQL Server estate-scale, guided with Copilot

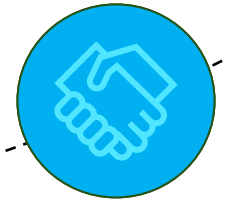

The higher up you start, the more value you realize, *faster*

Azure Database Migration Service (DMS)

Guided, standardized migrations

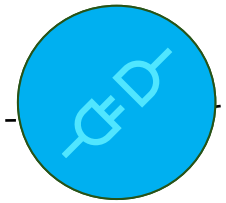

This is where most people start

- **Log Replay Service**
- **Managed Instance link**

Scriptable, online, requires expertise

Level of guidance & automation

Native backup & restore

One-off, offline, self-managed
