DATA SATURDAYS HOLLAND

Presets

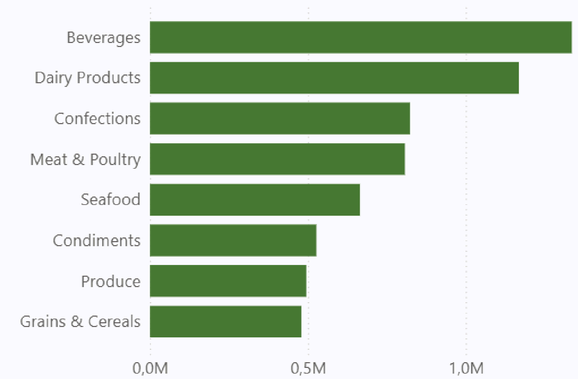

Style presets

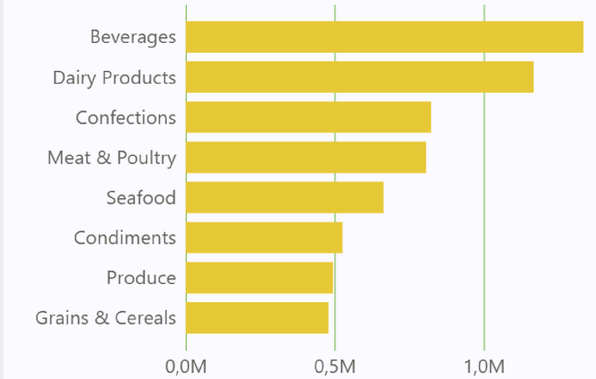

Set visual property defaults (`visualStyles`)

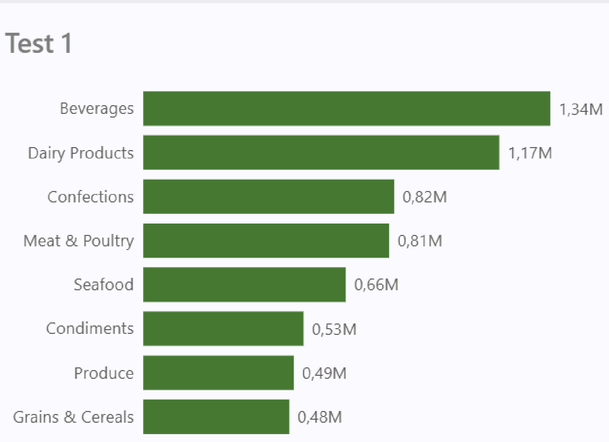

To create an extended-format JSON file, with more detailed and granular control over all visual formatting in a report, add a `visualStyles` section to the JSON file to nest the formatting specifics. See the following example of the `visualStyles` section:

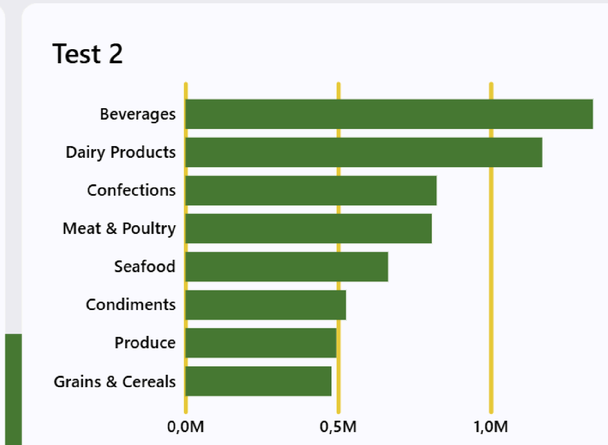

JSON Copy

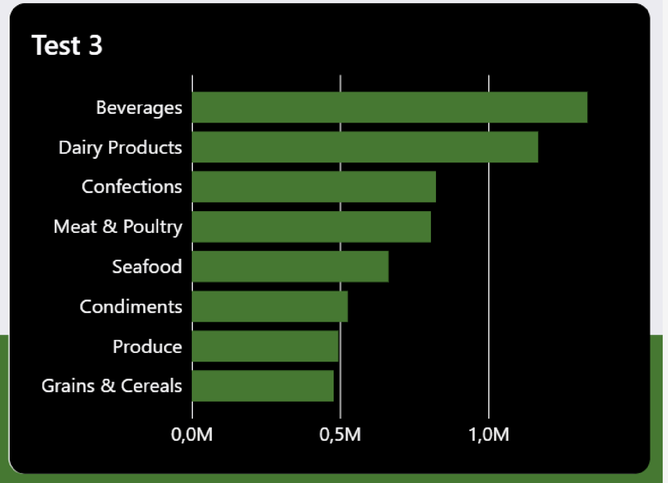

```
"visualStyles": {
    "<visualName>": {
        "<styleName>": {
            "<cardName>": [{
                "<propertyName>": <propertyValue>
            }]
        }
    }
}
```

Recap

standard Power BI

using a theme generator

theme JSON in visual studio

using pbip

style presets

organizational themes

Organizational theme

Key features

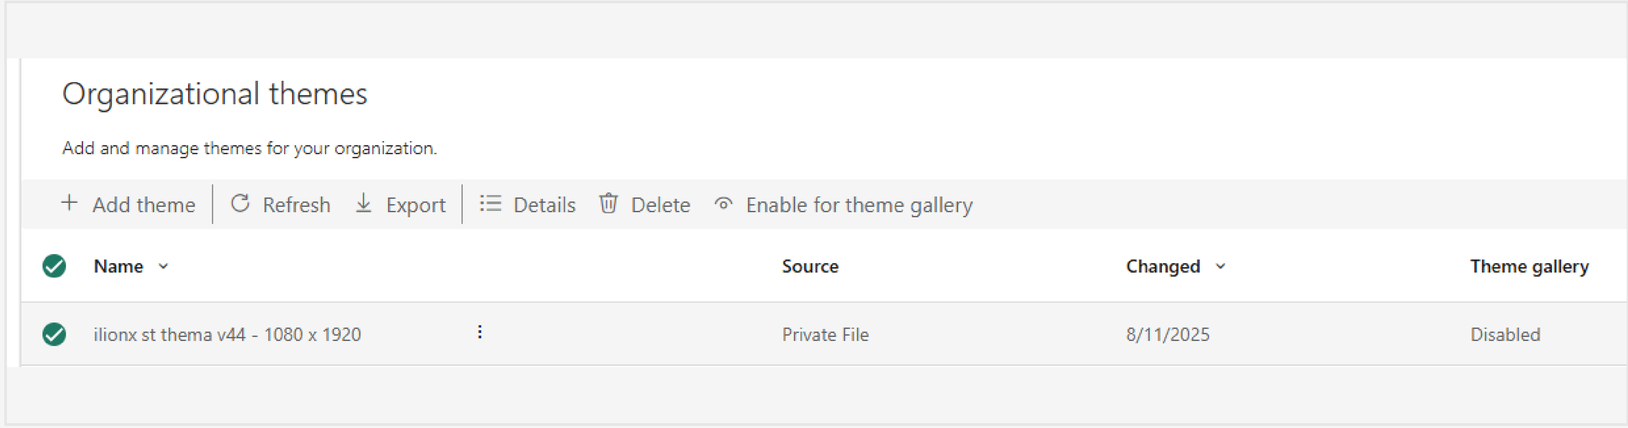

- Central management
- Multiple themes
- Integration with Copilot

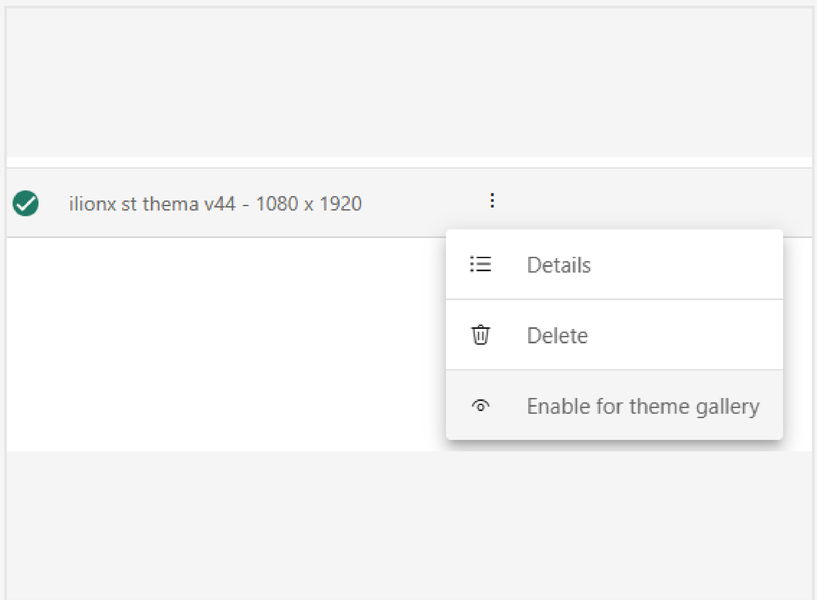

Benefits

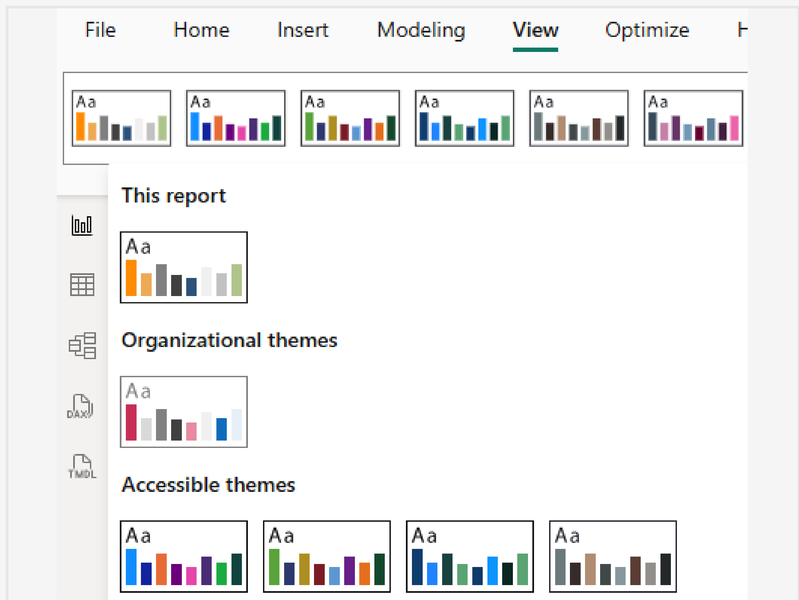

- Time savings
- Company branding
- Consistency
- Ease of updates

Restrictions

- Only the tenant admin can add themes
