SDLC COMMON CONTROLS CATALOG

SDLC
Common Controls Catalog
FINOS incubating

From a workshop to an official open standard in about a year. Another rising star.

- **What it is:** an open, composable reference library of software-delivery controls — one vocabulary for institutions, vendors and regulators
- **How it got here:** a Deutsche Bank workshop in July 2025 · a working group · three OSFF workshops · Governing Board approval in July 2026
- **Why it matters:** with AIGF, CALM and CCC it completes the Governance-as-Code pipeline — agentic development, auditable at scale
