Opening Remarks

Rohan Deshpande

FINOS Vice Chair and
Managing Director and Technology Fellow,
Goldman Sachs

FINOS Fintech Open Source Foundation

THE LINUX FOUNDATION

A DECADE TOGETHER: GOLDMAN SACHS AND FINOS

2016

Founding member

Symphony Software Foundation, the foundation that became FINOS

2016

Financial Objects

One of the very first initiatives: contributor to FDC3 and CDM standards work

2020

Legend contributed

Goldman Sachs open-sources its data modeling platform

2021

Chair

John Madsen chairs the FINOS Governing Board

2026

Vice Chair · OSERA

Rohan Deshpande, Vice Chair; Goldman Sachs a Premier member of OSERA

2026 IN NUMBERS

12,000+

code contributions by Goldman Sachs engineers to FINOS projects this year

150+

people contributing to Legend in 2026, the most of any single-firm FINOS project

10 yrs

of steady institutional commitment

OPEN SOURCING IS THE START OF THE JOURNEY

LEGEND

What it took to open-source a proprietary platform

Legal alignment, strategic buy-in and years of community building.

Open Source READINESS

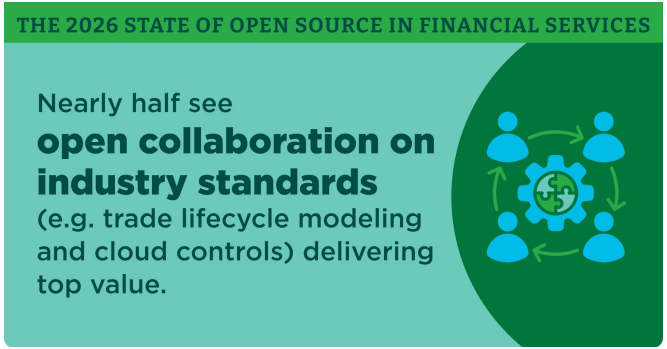

Open Source Readiness is now a formal FINOS program, helping the whole industry move faster.

OPPORTUNITY

AI uses Legend as the semantic layer

- Harmonized curated data
- Unambiguous model of products, trades, and lifecycle events
- Legend, CDM and Rune offer an open, executable semantic layer
- AI needs provide Legend with the largest adoption opportunity

COLLABORATE VIA INDUSTRY STANDARDS

Standards take time, steady institutional commitment and persistent community building.

FDC³ — Ratified, three conforming platforms, training, widespread production use

CDM COMMON DOMAIN MODEL — 130+ upgrades; Digital Regulatory Reporting and digital assets growing; new CDM for Java Developers training

CALM COMMON ARCHITECTURE LANGUAGE MODEL — Rapid acceleration: graduating with maintainers from six firms, integrated with AIGF, CCC and Fluxnova

OS-C — Goldman Sachs was an early member and remains a member

PIONEERING NEW OPEN AND AI FRONTIERS

AI is built with open source

Open source supply chain security is an active C-level conversation

The industry must lead together

FINOS' unique differentiator is that financial institutions are in the driving seat

That is why Goldman Sachs joined OSERA

The benefit is twofold: shared patching across members, and industry-wide Remediation Standards for everyone from patch producers to supply-chain infrastructure vendors.

The industry, and FINOS, is accelerating. We should help drive that evolution and shape what comes next.

TODAY: FROM FASTER THAN EVER TO TIME TO VALUE

1. **Opening remarks** Rohan Deshpande, Goldman Sachs — FINOS Vice Chair 
2. **The time to value is accelerating** Record project growth, a newly elected TOC — and announcements kept for this stage 
3. **CALM · CCC · CDM · FDC3 3.0** Updates from the maintainers, with special guests 
4. **New contributions** Two new members arrive with projects — unveiled on stage
5. **Linux in the Land of LLMs** Greg Kroah-Hartman, Linux Foundation Fellow 
6. **Open source supply chain security** OSERA & Akrites update, then Morgan Stanley, Deutsche Bank and Sonatype 
7. **This evening: regulation as code** Fireside: Rep. Bill Foster & Michael Hsu — then the Community Awards
